TASK-1 | CSE0001 – Digital Literacy
Digital Literacy Awareness Infographic

NAME: *PRIYAL MAHANA* **BRANCH:** *CSE(AIML)*

REG. NO. : *25BAI10049* **PROGRAMME:** *B.Tech*

Task Overview:

Create a one-page visual infographic using a free design tool that covers at least 3 digital literacy topics. Export and upload it to the task-1-presentation/ folder in your GitHub repository.

Tool Used:

Canva (canva.com) — Free version, 'Modern Steps Infographic' template.

Screenshot of Final Infographic:

DIGITAL LITERACY FOR COLLEGE STUDENTS

1. CRITICAL THINKING

Evaluate online sources critically. Check credibility, cross-reference facts, and identify bias in digital content before sharing or citing information.

2. INFORMATION NAVIGATION

Master search engines and academic databases. Use advanced search operators, filters, and Boolean logic to find relevant, reliable information efficiently.

3. DIGITAL COMMUNICATION

Communicate professionally online. Understand email etiquette, collaborate on digital platforms, and maintain a positive digital footprint.

4. ONLINE SAFETY

Protect your digital identity. Use strong passwords, recognize phishing attempts, and understand privacy settings across platforms.

Reflections:

For this task, I used the free version of Canva to build my awareness infographic. I started with a base called the 'Modern Steps Infographic' template because I liked how it naturally guided the eye, but I had to modify the layout heavily to fit my specific content.

My final design covers four main areas that I feel are highly relevant for first-year B.Tech students. The top section breaks down the core concepts of digital literacy, like critical thinking and navigating online information. From there, I detailed "Useful Digital Tools" focusing on things we actually need for coursework, such as cloud storage and coding platforms. The third section highlights safe internet practices, walking through a checklist of using 2FA, spotting suspicious links, and securing Wi-Fi. Finally, I included a section on building a professional online presence, mapping out the steps from a digital resume to LinkedIn optimization.

The most difficult part of this assignment was definitely the visual organization. Because I decided to include four distinct topics on a single page, trying to force all that information into the 'Modern Steps' template without making the canvas look completely cluttered was a big challenge. I spent a surprising amount of time just resizing text boxes, swapping out 3D icons for minimalist flat vectors, and adjusting margins so the flow made sense. It was interesting to realize how much careful planning goes into simply making information visually readable for an audience.
