TASK-3 | CSE0001 – Digital Literacy
Explore Coding & Collaboration Platforms

NAME: *PRIYAL MAHANA* **BRANCH:** *CSE(AIML)*

REG. NO. : *25BAI10049* **PROGRAMME:** *B.Tech*

Part A — Coding Practice (HackerRank)

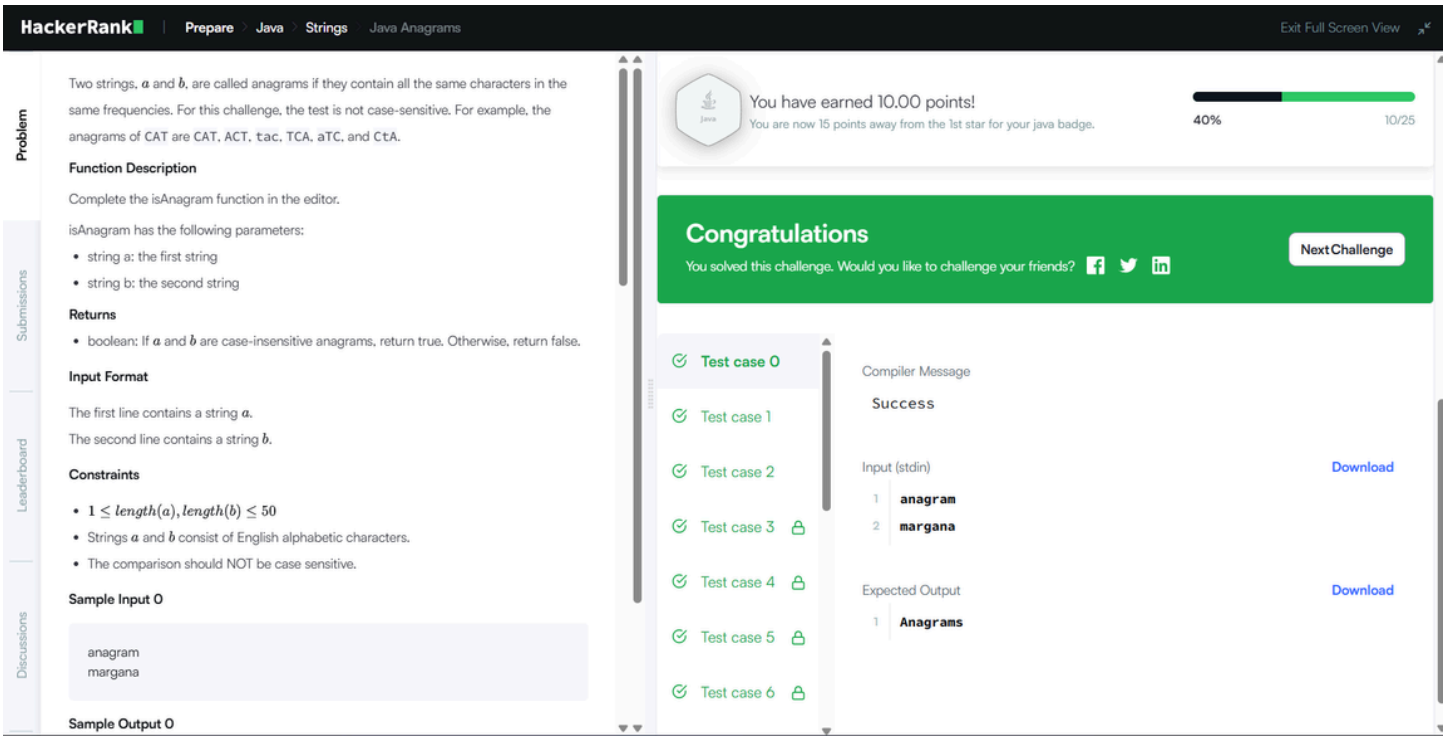
Platform chosen: HackerRank (hackerrank.com) | Username: @priyalmahana941.
Challenge completed: Java Anagrams an Easy(Basic) level question. The challenge required to give a boolean output of two string if they contain all the same characters in the same frequencies. I submitted the following Java solution:

```java
import java.util.Scanner;…

    static boolean isAnagram(String a, String b) {
        // Complete the function
        if(a.length()!=b.length()) return false;
        a = a.replaceAll("\\s", "").toLowerCase();
        b = b.replaceAll("\\s", "").toLowerCase();
        int[] count = new int[26];
        for(int i=0;i<a.length();i++){
            count[a.charAt(i)-'a']++;
            count[b.charAt(i)-'a']--;
        }
        for(int num : count){
            if(num != 0){
                return false;
            }
        }
        return true;
    }

    public static void main(String[] args) {…
```

Result: 16/16 — all test cases passed. Screenshot saved in task-3-platforms/.



Part B — Google Forms Quiz

I created a Digital Literacy Awareness Quiz on Google Forms with 5 questions(3 are Multiple choice question and 2 Short answer question), linked to a Google Sheet for automatic response collection.

Form link (also in README.md): Digital Literacy Quiz

Questions in the Form:

1. When emailing a college professor for the first time, which of the following is the most professional greeting?

(a) Hey there

(b) Dear Professor [Last Name]

(c) Hi[First Name]

(d) To whom it may concern

2. What does "2FA" stand for in digital security?

(a) Two-File Access

(b) Total Fraud Avoidance

(c) Two-Factor Authentication

(d) Two-Folder Authorization

3. Which of the following is the safest way to verify if an urgent email claiming to be from your bank is legitimate?

(a) Click the link in the email to see if the website looks real.

(b) Reply to the email asking the sender to confirm their identity.

(c) Call the bank using the official phone number listed on the back of your debit card.

(d) Forward the email to a friend to get their opinion.

4. Briefly define what a "digital footprint" is in one or two sentences.

5. Name one major security risk of making a UPI payment or accessing a bank account while connected to a free public Wi-Fi network.

Reflection:

Both platforms I explored in this task will directly benefit my academic journey. HackerRank provides a structured, judge-graded environment for practising problem- solving — far more effective than reading theory alone, because I get instant feedback on whether my code is correct, efficient, and handles edge cases. Even completing one beginner challenge helped me understand the importance of writing clean, readable code.

Creating the Google Form was more thoughtful than I initially expected. Writing clear, unambiguous quiz questions is a real skill — my first draft of Question 1 had two plausible answers, and I had to revise it to make it fair. Google Workspace tools like Forms, Sheets, and Docs are used across every industry and academic discipline, and learning them now means I will be more productive from my very first group project or research assignment.

Together, these two tools represent two core skills: problem-solving practice and digital collaboration — both of which I will use throughout my four years at VIT Bhopal.
